

PEDIATRIC EYECARE.

Children are our future. What they learn today will greatly influence our world tomorrow. In fact, for the first 12 years of life, nearly 80% of learning is accomplished through the eyes. That's why protecting their vision is so important. For the experienced, personalized eyecare you can trust for your child, look to Drs. Roy A. Kline and Carolee R. Boyd. By diagnosing and addressing vision problems early, Drs. Kline and Boyd can make a positive difference in your child's life.

THE STATISTICS ARE ALARMING.

According to the National Parent Teacher Association, more than 10 million children suffer from vision problems that are impeding their academic performance. The Vision Council of America reveals that approximately 80% of children with a learning disability have an undiagnosed vision problem that interferes with learning. Children with vision problems rarely outgrow them. And it's no secret that the struggles become worse as the reading demands increase at each higher-grade level.

YOUR CHILD'S FIRST EYE EXAM.

The American Optometric Association, the American Academy of Ophthalmology and the American Academy of Pediatrics recommend a first eye exam at 6 months of age, again at the age of 3 or 4 and then every one to two years thereafter. At the office of Drs. Kline and Boyd, your child will be treated with the utmost care and concern from the moment you first arrive. You will accompany your child throughout their exam and get answers to any questions you may have. In addition to pinpointing eye disease, Drs. Kline and Boyd's comprehensive pediatric vision evaluation can help identify problems with focusing, eye movement, eye teaming and eye-hand coordination.

Make sure your child sees well into the future with the clear, healthy vision they deserve. Call and schedule an appointment with Drs. Kline and Boyd today at (518) 792-2345.
